We hear from all sources flattering reports of the appearance of the bloodhounds in Philadelphia, among which is that of the military critic of the Boston Herald. "The money," he writes, "is given by Maine to the Centennial at Philadelphia was a great credit to that state. It was the only original and original of the full dress uniform of the regular service that appeared to understand the value of discipline and cleanliness, as well as of duty." Coming from the source that it does this is a great compliment for the men from Maine, finding a detail from this town. Could the members of the next Legislature have seen the Maine troops in the parade and would be ready to vote the militia a generous appropriation, comparing favorably with that of other states? It is a question which is asked at present. The support and influence of towns where companies are located are indispensable to the maintenance of good men, and the retention of such records as the Maine militia has been honored with in the past. No state in the Union has entered into a competition with the state of Maine in the maintenance of its militia. The above should be cause for congratulation from all citizens of the state and their individual encouragement given to commands in their town or nearest to them.

We hear from all sources flattering reports of the appearance of the bloodhounds in Philadelphia, among which is that of the military critic of the Boston Herald. "The money," he writes, "is given by Maine to the Centennial at Philadelphia was a great credit to that state. It was the only original and original of the full dress uniform of the regular service that appeared to understand the value of discipline and cleanliness, as well as of duty." Coming from the source that it does this is a great compliment for the men from Maine, finding a detail from this town. Could the members of the next Legislature have seen the Maine troops in the parade and would be ready to vote the militia a generous appropriation, comparing favorably with that of other states? It is a question which is asked at present. The support and influence of towns where companies are located are indispensable to the maintenance of good men, and the retention of such records as the Maine militia has been honored with in the past. No state in the Union has entered into a competition with the state of Maine in the maintenance of its militia. The above should be cause for congratulation from all citizens of the state and their individual encouragement given to commands in their town or nearest to them.

It is no longer necessary to say that they are made up with the old fashioned purgative pills, and that they are giving way to a more scientific use of this mill and its contents.

Booth's Little Pills are entirely unlike all other pills, and are in vogue all over the world. They are very small, strongly colored, and so made, and so used, that they are really taken by adults or old without a thought of the pain or inconvenience.
